

# Permitting Services Manager

Job Opening with Innovative Ag Services – San Joaquin Valley, CA

## Permitting Services Manager Summary:

---

The Permitting Services Manager will lead permitting services to current and new agricultural clients within the San Joaquin Valley of California. The Permitting Services Manager will provide clients with assistance in any proposed modifications of their dairy or facility for continued success or growth. The Manager will coordinate with other departments, agencies, and consultants in the projects.

While Innovative Ag Services has a team of professionals that provide value-added compliance services, our clients often need permitting service to meet their existing, expanding, or new operations. To complement our compliance services, we provide permitting services led by professionals who can work with the agricultural clients, our compliance team, engineering firms, trade associations, permitting agencies and others to acquire the permits needed. We are looking for someone who provides great customer service to all our clients and the ability to build strong relationships with those we serve.

## Responsibilities

---

### Primary Responsibilities:

- Lead County permitting services for Kern, Kings, Fresno, Madera, and Tulare Counties including: Special Use Permits, Conditional Use Permits, Building Permits
- Lead permitting services with the Regional Water Quality Control Board Report of Waste Discharge
- Lead permitting services with San Joaquin Valley Air Pollution Control District, Prepare and Submit the Authority to Construct, Permit to Operate, and CARB Permits

### Other Responsibilities:

- Provide the necessary documents to the State Water Resources Control Board: Water Use ID, Yearly reporting of Diversion/Use
- Provide the Department of Public Health services including Hazardous Material Business Plan
- Conservation Innovation Grant Applications and Resource Conservation District Grant Writing Services
- Industry Research and Development including: attend regulatory and industry meetings, closely follow the development of the General Order Waste Discharge Requirements for Wineries, identify professional service needs in the industry, and develop service packages

## Minimum Qualifications

---

- Bachelor of Science Degree
- Excellent Organizational and Time Management Skills
- Strong Communication and Relationship Skills
- Familiarity with California Environmental Quality Act
- Public Speaking/Presentation Experience
- 5-years of professional experience in Agricultural, Environmental, Permitting Industry

## Compensation:

---

Salary will be determined by candidate's skill and experience level and highly competitive with industry standards. Benefits package includes full employee medical health coverage, life insurance, paid time off, and employer match 401(k) contribution.
